These defects can begin in the first month, even before you know you are pregnant. Call your healthcare provider between visits as needed, especially if you are worried about symptoms. What You Should Know About Generic Substitutes You should know that if you switch to a generic substitute, you may not get the same one with each refill since there are many different manufacturers. Do not discontinue or change the amount you take, or how often you take it, unless directed to do so by your doctor. If you take Depakote during pregnancy for any medical condition, your baby is at risk for serious birth defects that affect the brain and spinal cord and are called spina bifida or neural tube defects. Talk to your healthcare provider if you have questions. Call a healthcare provider right away if you have any of these symptoms, especially if they are new, worse, or worry you: Ask your healthcare provider about the best way to feed your baby. The Depakote brand looks like this: With the Co-Pay card , eligible patients could receive Depakote for less than the cost of a generic substitute. Birth defects may occur even in children born to women who are not taking any medicines and do not have other risk factors. Do not start or stop other medicines without talking to your healthcare provider. Tell your healthcare provider right away if you become pregnant while taking Depakote. To protect your Depakote prescription, have your physician write DAW or "Dispense as Written" or your state's specific language. Look at your pill bottle before leaving the pharmacy make sure the bottle label states Depakote and the manufacturer is listed as AbbVie. Copay assistance program is not available to patients receiving prescription reimbursement under any federal, state, or government-funded insurance programs for example, Medicare [including Part D], Medicare Advantage, Medigap, Medicaid, TRICARE, Department of Defense, or Veterans Affairs programs or where prohibited by law or by the patient's health insurance provider. Talk to your doctor about the importance of Depakote in your treatment plan. Learn about benefits and risks of Depakote (divalproex sodium)Missing: pre ?o. Generic substitutions for Depakote prescriptions are frequently made at the pharmacy. Learn your state's required language to help prevent unwanted unahistoriafantastica.comg: generico ?pre ?o. Children under the age of two years are at a considerably increased risk of developing fatal hepatotoxicity, especially those on multiple anticonvulsants, those with congenital metabolic disorders, those with severe seizure disorders accompanied by mental retardation, and those with organic brain disease.
