About Stateline Stateline provides daily reporting and analysis on trends in state policy. Along with patient education, urine drug testing, and abuse-deterrent formulations of pain pills, the federal agency recommended prescribers check prescription databases before prescribing to reduce the risk of opioid overdose and addiction. They can also skip the step if a patient was originally prescribed a pain medication by a fellow doctor in their practice and needs a refill or a different pain medicine. Our quarterly news magazine. To increase the effectiveness of drug monitoring programs, Kentucky and other states use reciprocal agreements to allow interstate sharing of drug dispensing information for pharmacists, law enforcement and physicians in nearby states. But a relatively small percentage of medical professionals are signing on to the systems to detect patients who are at risk for addiction or overdose. Listen to the latest episode. Browse our reports, briefs, and analyses and help us turn indifference into action. Trust Magazine Our quarterly news magazine. But the rules governing who has access, how quickly pharmacies must enter dispensing data, and which medications are included vary widely from state to state. Pew's work lays the foundation for effective policies and practices by invigorating civic life, conducting research, informing and engaging citizens, linking diverse interests to pursue common cause, and insisting on tangible results. Pew applies a rigorous, analytical approach to improve public policy, inform the public and invigorate civic life. Since the law was passed, overdose hospitalizations declined 26 percent, and prescription opioid deaths dropped 25 percent, the first reduction in nearly a decade, according to a March report by Shatterproof, a national advocacy organization that promotes prevention and treatment of drug addiction. They can definitely conceal the disease from their physician in a minute visit. The number of people receiving the cocktail has dropped 30 percent since the law took effect and the number of doctor shoppers has dropped 52 percent, he said. In most states, health care professionals who prescribe at least one controlled medication are encouraged to use PDMPs, but only on a voluntary basis.
