If someone has overdosed and has serious symptoms such as passing out or trouble breathing , call Consult your pharmacist or local waste disposal company for more details about how to safely discard your product. If you notice other effects not listed above, contact your doctor or pharmacist. Keep all medicines away from children and pets. Storage Store at room temperature away from light. Tell your doctor right away if any of these unlikely but serious side effects occur: Prednisolone works by relieving symptoms such as swelling, redness, and itching. This can increase your risk for serious side effects or may cause your medications not to work correctly. Look downward and gently close your eyes for 1 to 2 minutes. Talk to your pharmacist for more details. A different medication may be necessary in that case. Do not drive, use machinery, or do any activity that requires clear vision until you are sure you can perform such activities safely. If your doctor does approve the wearing of contact lenses during treatment with this medication , remove the lenses before using the eye drops. Use of contaminated eye medication can cause infection, serious damage to the eye, and loss of vision. Please choose to continue your session or sign out now. Missed Dose If you miss a dose, use it as soon as you remember.
