Celebrex may raise your blood pressure. Problems are more likely to occur if you are dehydrated, have heart failure or kidney disease, are an older adult, or if you take certain medications see also Drug Interactions section. It is used to treat arthritis, acute pain, and menstrual pain and discomfort. However, if your doctor has directed you to take low-dose aspirin to prevent heart attack or stroke usually at dosages of milligrams a day, you should continue taking the aspirin unless your doctor instructs you otherwise. Some products that may interact with Celebrex include: Stomach upset or gas may occur. If either of these effects persists or worsens, tell your doctor or pharmacist promptly. A very serious allergic reaction to Celebrex is rare. What can I do to prevent this in the future? Do not lie down for 10 minutes after taking Celebrex. Celebrex may rarely cause serious possibly fatal liver disease. Celebrex may also be used to treat gout attacks. Talk to your pharmacist for more details. Remember that your doctor has prescribed Celebrex because he or she has judged that the benefit to you is greater than the risk of side effects. Before taking Celebrex, tell your doctor or pharmacist if you are allergic to it; or to aspirin, other NSAIDs such as ibuprofen, other COX-2 inhibitors; or if you have any other allergies. During pregnancy, Celebrex should be used only when clearly needed. Drug interactions may change how your medications work or increase your risk for serious side effects. Celebrex Possible Interactions Drug interactions may change how your medications work or increase your risk for serious side effects. While there have been no reports of harm to nursing infants, consult your doctor before breast-feeding. Before using Celebrex, tell your doctor or pharmacist your medical history, especially of: Compare Celebrex mg prices from verified online pharmacies or local U.S pharmacies.
