Is your decision based off a difference in taste or is it simply a matter of paying for quality of the product? The generic labels may not be as fancy as the brand-name products, and the taste of generic items, such as soda, may not appeal to you depending on your taste buds, but it's worth trying generic brands to see if you like them. Find support, ask questions and share your experiences. Yes, my password is: And if the savings isn't enough, or the show more content. While generic works for most over-the-counter medicines, prescription medicine is something that shouldn't be switched back and forth between generic and brand names, she said. Insurance companies prefer that doctors write for generic prescription medications instead of branded medications because the generics are cheaper, but if the branded label works better for the patient, a doctor can write to the insurer and explain that the branded product is needed, Rosenbaum said. They are created through consistent messages sent to consumers about a product or company, often differentiating it from other brands. Its therapeutic classification is an antihyperglycemic. In colleges especially, there seems to be an emphasis on appearances, so many students have a tendency to. The aim of this research is to find out why brand names are important to consumers. I have to pay more money for glugophage, and would rather spend the money if its better, I changed to generic metformin and havent so far noticed much difference. Feb 7, - 1 Answer - Posted in: glucophage, diabetes, type 2, metformin - Answer: The manufacturer. Glucophage is the brand name, metformin is the generic. Nov 5, - Where can I buy brand name Glucophage XR mg. Does anyone use the I am only interested in brandname Glucophage (I read that brand glucophage is more effective than regular generic metformin). I never bought There really isn't that much difference in effectiveness just price. Most people use Which Generic Brand Metformin. Feb 21, - I recently had a mail order 90 day refill of Sun Pharma generic metformin XR. Took it for about two weeks and had a bad reaction (skin rash, burning legs and face and semi-poisoned feeling. Prior to that I took Teva metformin with no problems. I talked to my Dr and switched to Glumetza. It's a brand name. Yes, metformin is a generic version of brand names Glucophage, Fortamet, Glumetza and Riomet. It is also one of the ingredients in the following combi. My doctor upped my dosage to day and my mail order drug co. switched me to Metformin (generic). I have since stopped losing weight and I think my blood sugars aren't what they used to be (slightly higher now). I think next time around, I am going to request the Glucophage. Anyone else had this. Jul 5, - I started on mg metformin and had great results but the gastric side effects were troubling enough that I switched to metformin ER. That helped Dr. Bernstein recommends using the brand vs generic, but insurance won't pay and I can't afford. So - I'm stuck I just wish I could afford the Brand name. Nov 6, - But to answer your question there is no difference between the generic and brand name when it comes to this medicine. At least that is what I was told by my RE and the pharmacist. The generic (Metformin) is what I was taking when I was blessed with my twin pregnancy. I don't know who the manufacturer. Mar 30, - Also, I've seen plenty of patients who complain that the generic glucophage xr or generic fortamet does not seem to be reducing side-effects to the same extent as the brand-name. On the other hand, I've also seen people who claim that one manufacturer of generic glucophage xr is better for them than. What are generic drugs? A generic drug is a chemically equivalent, lower-cost version of a brand-name drug, costing % less! A brand-name drug and its generic version must have the same active ingredient, dosage, safety, strength, usage directions, quality, performance and intended use.
