Search UniChem for chemicals with the same backbone. For the acute and chronic treatment of signs and symptoms of osteoarthritis and rheumatoid arthritis. Contact us Privacy and Cookie Policy. Diclofenac does not alter glucose metabolism in normal subjects nor does it alter the effects of oral hypoglycemic agents. Concomitant administration of diclofenac and aspirin is not recommended because diclofenac is displaced from its binding sites during the concomitant administration of aspirin, resulting in lower plasma concentrations, peak plasma levels, and AUC values. Both hypo- and hyperglycemic effects have been reported. Take with food to reduce irritation. Benzylpenicillin, ampicillin, oxacillin, chlortetracycline, doxycycline, cephalothin, erythromycin, and sulfamethoxazole have no influence in vitro on the protein binding of diclofenac in human serum. Severe, rarely fatal, anaphylactic-like reactions to diclofenac have been reported in such patients. As prostaglandins sensitize pain receptors, inhibition of their synthesis is responsible for the analgesic effects of ketoprofen. Antipyretic effects may be due to action on the hypothalamus, resulting in peripheral dilation, increased cutaneous blood flow, and subsequent heat dissipation. NSAIDs are often essential agents in the management of arthritis and have a major role in the management of pain, but they also may be commonly employed for conditions that are less serious. The mean changes were observed to be less than 1 second in both instances, however, and are unlikely to be clinically important. Pharmacology. Metabolism: liver extensively; CYP 2C8, 2C9 (primary), 3A4 substrate; UGT: 2B7 substrate. Excretion: urine 65% . DESCRIPTION. Cataflam (diclofenac potassium immediate-release tablets) is a benzenecetic acid derivative. Cataflam is available as immediate-release tablets of 50 mg (light brown) for oral administration. The chemical name is 2-[(2,6-dichlorophenyl)amino] benzenecetic acid, monopotassium salt. The molecular. Medscape - Rheumatoid arthritis, osteoarthritis-specific dosing for Voltaren XR, Cataflam (diclofenac), frequency-based adverse effects, comprehensive interactions, contraindications, pregnancy & lactation schedules, and cost information. Cataflam 50 mg Coated Tablets - Summary of Product Characteristics (SPC) by Novartis Ireland Limited. PHARMACOLOGICAL PROPERTIES; Pharmacodynamic properties; Pharmacokinetic properties; Preclinical safety data; 6. PHARMACEUTICAL PARTICULARS; List of excipient(s); Incompatibilities. In the United Kingdom, Voltarol can be supplied with either the sodium salt or the potassium salt, while Cataflam, sold in some other countries, is the potassium salt only. However, Voltarol Emulgel contains diclofenac diethylammonium, in which a % concentration is equivalent to a 1% concentration of the sodium salt. Cataflam drug information: Actions, Administration, Pharmacology. Cataflam - General Information. A non-steroidal anti-inflammatory agent (NSAID) with antipyretic and analgesic actions. It is primarily available as the sodium salt. Pharmacology of Cataflam. Cataflam is an acetic acid nonsteroidal antiinflammatory drug (NSAID) with analgesic and antipyretic properties. Cataflam is used to. Chemical Names: Diclofenac potassium; ; Cataflam; UNII-L4D5UA6CB4; Diclofenac potassium [USAN:USP]; CGP B More Molecular Formula: C14H10Cl2KNO2. Molecular Weight: g/mol the formation of prostaglandins that are involved in pain, inflammation and fever. Pharmacology from NCI. Cataflam, Tablet, sugar coated, 50 mg/1, Oral, Novartis, , , US Us. Diclo Gel 1% with Xrylix Sheets, Kit, Shoreline Pharmaceuticals, Inc. , Not applicable, US Us. Diclofenac EC, Tablet, delayed release, 50 mg, Oral, Sanis Health Inc, , Not applicable, Canada Canada. Diclofenac. Forest, Illinois; 6Clinical Pharmacology, Hospira, Inc., Lake Forest, Illinois; 7Department of Anesthesiology., Tufts Medical Center, Boston, . lofenac (Cataflam). The primary objective of these studies was to characterize the pharmacokinetic profile of HPbCD-diclofenac via different routes of administration compared with.
