I thought the prescription motrin was mg, the equivalent of three mg pills (which you can have every 6 hours) you would buy over the counter. So if you're talking about an 800mg motrin I'm guessing that would be equivalent to four over the counter motrin pills (which you can have every 8 hours). For most people, 1 or 2 OTC Ibuprofen will take care of their minor pain issue (ie: Headache, or short term injury) -- when a person finds themselves needing a prescription strength, mg of ibuprofen to make a dent in the pain it is a good indicator they need to be evaluated by a physician. Many people see Ibuprofen and. My question is this when I look on the OTC Ibuprofen bottle, it says not to take more than 1,mg in a 24 hr. period. When I look My question is this isn't OTC and prescription Ibuprofen the same thing?? So does anyone know why this would not be safe, and if there are any differences in the OTC vs. Sep 13, - [I didn't really think about it until now but a quick Google search tells me there is zero difference between prescription and OTC acetaminophen \(Tylenol\) other than dosage, but then doesn't it just come down to how many pills you are taking \(e.g. five OTC mg = two RX mg\)? A little annoyed that I. According to my internist, no. I had tendonitis and he said he could write me a prescription for Ibuprofen \(active ingredient in Motrin, not sure what brand name he mentioned\), or I could just buy some over the counter and take double the recommended dose.
