I started having BPH problems when I was 62 years old. I smoke a lot and consume alcohol from time to time. John I am 53 years old and telling the truth when I say that my erection is far from ideal. I went to the doctor and he prescribed 10 mg pill for me to take on a daily basis for three days. I took a Cialis tablet an hour before expected intercourse, and after a couple of glasses of wine, it all happened. Sexual stimulation is key All PDE5 inhibitor acting drugs Cialis vs Viagra comparison , require sexual stimulation for them to take effect. As a result of this lifestyle, I have problems maintaining an erection. The most common side effects that may occur include dizziness, impairment of senses, and fatigue. I go commute by car, and at home I also spend time on the couch watching TV. The recommended dose is dependent on patient condition and severity of impotence. However, Cialis should not be taken more than once per day. I still felt an effect the next day. An initial dose of Cialis is recommended at 10 mg, which may be later increased or decreased depending on the sensitivity to the medication. Therefore, I will choose Cialis in the future, as it suits me well. All PDE5 inhibitor acting drugs Cialis vs Viagra comparison , require sexual stimulation for them to take effect.
