Using the smaller syringe you purchased, draw out 0. Using the lower and upper bounds of dosages, we determine an acceptable range of 2. Now I want to create a mL vial of the diluted solution so I again multiply top and bottom by to get 27,mcg per mL. If you simply want to know the proper dilution and dosage then jump to the Quick Start Guide. The pounds cancel out and we are left with 2. I have no idea what the long term impact is, perhaps nothing, but why take the risk when it is not needed? This guide is simply being posted to help combat the misinformation posted all over the web and is intended for information only. Based upon the above math, we need to mix 2. Next using the smaller syringe you purchased draw out 2. So my 44 lbs dog would require a 0. This means we need to mix 2. I chose the second method, in order to achieve an easy to remember final dosage. To get rid of the decimal on the bottom, multiply top and bottom by to get mcg per 1mL. The only active ingredient in Heartgard is Ivermectin. Ivermectin is highly powerful. Create new account Request new password.Generic brands may vary. This product can not be shipped into California.
