It is chemically unrelated to the benzodiazepine class of medications for sleep, e. Is there some additive or something? Well, I love em. What makes it another good product is that it still lasts six hours more or less. So does these Klonopin wafers actually have a better bio-availability than a regular Klonopin crushed and than taken sublingual? I much rather prefer these to the regular Klonopins which are impossible to dissolve under your tounge unless they are geberic. Or maybe that is Schedule III??? It sounds kinda nutty to have those small doses but I guess it isn't half bad for those who are ready to taper: Well i conned my doctor into prescribing me Ativan. Well I took my first one 45 minutes ago and it took no longer than minutes to kick in apposed to an hour or more it takes for the regular tablets. Well, I've seen the Klonopin Wafer booklet around my psychiatrist office a few times but finally decided to read it. Klonopin itself is one of the easier Valium and Ativan aside benzodiazepines to be prescribed but I'm sure if you brought the booklet to your psy doctor and told them that you can very much relate to what is in the booklet. I get my Dexedrine from a psychiatrist and most doctors will not prescribe uppers and downers at the same time Perhaps I'll ask my psychiatrist about them

Zaleplon Sonata is a hypnotic a medication that induces sleep that is used for treating insomnia. I saw these while working as a pharmacy tech a while back. I'm imagining communion wafers, haha: Also, I bet they'd be very easy to snort not that I snort pills anymore since it's water soluble. Compare prices and print coupons for Clonazepam (Klonopin) and other Epilepsy, Lennox-Gastaut Syndrome, and Panic Disorder drugs at CVS, Walgreens, and other pharmacies.
