Large number of inhalations or more frequent administrations should not be done since overdosing symptoms are quite adverse and can react differently in different people. They can only fill prescriptions issued by a physician licensed in a province or territory of Canada. Salmeterol and fluticasone can bring down those blood cells that fight bodily infections. Salmeterol can increase risks associated with asthma related deaths especially if you are using it for an extended period of time. The two components together help to prevent asthma attacks. It is extremely important for you to follow only the prescribed dose and to stick to the recommended period of time. Manitoba pharmacists are not permitted to fill US physicians' prescriptions. Some of the serious side effects to this medication include bronchospasm characterized by breathing troubles, tightness in chest and wheezing, uneven or fast heartbeats, tremor, feeling of restlessness, cough with green or yellow mucus, stabbing chest pain, chills and fever. Salmeterol, on the other hand, is a bronchodilator that operates by relaxing muscles of the airways for improving breathing. Advair HFA is usually recommended for patients who are not sufficiently controlled by a long term asthma control therapy like an inhaled corticosteroid and those who are in imperative need of both an inhaled corticosteroid and a long acting beta adrenergic antagonist LABA like salmeterol. Make sure you store the inhaler at room temperature and away from moisture and heat. The maximum dose is however, only 2 inhalations twice every day. Monday to Friday 8: Advair HFA treats two major causes of symptoms of asthma: To provide a secure and safe shopping experience, Canada Drugs is committed to meeting and exceeding all standards outlined by the leading pharmacy accreditation organizations. Report spam and other email abuse on the complaints page. Advair HFA is recommended for 2 inhalations to be inhaled twice daily on an everyday basis.
