Please see our plain English privacy policy. Conclusion Buying antibiotics without a doctor's prescription is easy. They prefer to buy a large quantity of medicine for a cheap price rather than visiting dermatologist every time they need a refill. If an untrained person uses the wrong antibiotic his condition may get worse and he may wind up in the hospital. For instance, penicillins a family of drugs with names ending in "-cillin" such as pen icillin , amoxi cillin , ampi cillin are effective against streptococcal infections, syphilis, and Lyme disease but for community-acquired pneumonia, bacterial diarrhea, mycoplasmal infections or gonorrhea you would be better off using a quinolone a family of drugs with names ending in "-oxacin such as levofl oxacin Levaquin or Ciprofl oxacin Cipro. If you take an antibiotic that you are allergic to you could develop an anaphylactic reaction, go into shock and die. Why not do what everyone else does - go to the doctor, get a prescription and take it to the drugstore? People who buy medicine from ethnic markets are typically poor and originate from cultures where buying antibiotics over-the-counter is the norm. Most of the formulations were available as liquid gel drops or powders that are difficult for people to take. We wanted to determine if it was possible to obtain antibiotics without a prescription and how people do it. Side Effects Antibiotics can cause side effects.
