The results showed that people taking citalopram Celexa , from a class of antidepressants known as selective serotonin reuptake inhibitors, or SSRIs, gained more than two and a half pounds, on average. I have just started taking it and found out that alot of people lose weight, which is strange because I thought anti-depressants make you gain weight, sometimes ALOT of weight! Also I couldn't come on any other medicine. Ive been on both versions and havent noticed much difference. Has anyone else noticed that welbutrin makes tobacco gross? Granted this was with my second husband whom I would not spit on if he were on fire. It is prescribed as Zyban for nicotine cessation, and with good reason. Perlis and one of his co-authors have consulted for and received funding from numerous antidepressant drug manufacturers. Many people lose weight on it because of its stimulant effects which decrease appetite. In the name of harm reduction and good sense i would tell everyone not to do this! Ive been on the name brand XL and SR versions and various generic SR versions as well as zyban which is just bupropion SR with a much higher price tag then the generic bupropion. It sped me up like mad but, then, it was the first AD I ever took. It was fantastic for me until it just stopped working.

Aug 24, - I have been on the generic Wellbutrin for depression for about 3 to 4 months now and have packed on a significant amount of weight. I cannot get enough sleep, but I notice that I toss and turn all night long. Has anyone else noticed that this is a side effect of the medicine? Respond to this unahistoriafantastica.comg weight on Bupropion HCL?

Jun 6, - I recently started taking mg of generic wellbutrin for depression and i wanted to see if people have lost or gained weight on this medication, i. Hopefully there is some subtle benefit that I'm receiving that I'm not aware of. But I think this is one of the few that does not cause weight gain for most unahistoriafantastica.com back on Wellbutrin.

Aug 10, - I've been on Wellbutrin SR for 2 years and was recently switched to the generic. I have notice weight gain and depressive mood. Could this be my.

Jan 28, - Before you assume that it's the Wellbutrin causing you to gain weight, take an honest look at the stack of other medications and supplements you are taking. If you are on another Wellbutrin doesn't have weight gain as part of its pedigree, whereas many other antidepressants do. Although it may seem like.

Mar 4, - Two years ago, when my doctor first wrote me a prescription for bupropion, an antidepressant, I asked him, Will I gain weight? A decade earlier, I'd taken Wellbutrin, a brand name for bupropion, which doesn't target serotonin, and it hadn't affected my writing; my depression, however, had persisted (and.

Jan 18, - Hopefully you understand that weight gain has more to do with your metabolic and hormone function than it does with how many calories you are It doesn't mean it won't work at all, it just means that Wellbutrin is not targeting the root cause of your weight gain and isn't likely to lead to significant weight. And of course the doctors helped propagate this myth by "assuring" patients that it wouldn't cause weight-gain like the older drugs, and by putting the . In reality, most people do not lose or gain weight on bupropion. I take mg a day, but haven't lost any weight at all, but I do feel better on Wellbutrin.

Apr 23, - Migraines, chest pains, palpitations, have been to the ER a few times thinking I was having a heart attack or anaphylaxis and checked out fine physically, weight gain, bloating that has only increased, peeing more and more, ringing ears, depression, worsening anxiety, low blood sugar, tremor, bad taste that.

Feb 20, - I noticed rapid weight gain with all of them. Granted the weight was slowing piling on over the few years from college til now because I would binge and now I am pretty sure it was to fill that void that now the medication is now able to do. My dr first started me on the mg Bupropion (generic wellbutrin) sr. Up to 25% of people who take antidepressants gain weight. Is there anything you can do about it?
