Buspar appears to have captured a small but significant slice of the market for mild tranquilizers but it lags far behind the benzodiazepines. Room for Debate asks whether shorefront homeowners should have to open their land to all comers. Politics Education Texas N. Karl Rickels, professor of psychiatry at the University of Pennsylvania medical school, said he finds Buspar "not significantly worse than but certainly not better than" the benzodiazepines. David Sheehan, professor of psychiatry the University of South Florida in Tampa, called Buspar "a laudable step in the right direction" because it appears dramatically safer than the other tranquilizers. The company's promotional efforts drew a sharp rebuke late last year when Ralph Nader's Public Citizen organization complained to the Food and Drug Administration that an advertisement suggesting that Buspar could be used by anxious air traffic controllers was "life-endangering" because the drug's side effects could adversely affect the controller's performance. Instead, Buspar is recommended for general, persistent anxiety that lasts at least a month and includes such symptoms as trembling, jitteriness, inability to relax, sweating, heart pounding, worry, fear and difficulty in concentrating. Although Buspar's effectiveness has been questioned, he said, "We should not abandon the whole class of drugs but should monkey with the molecule a bit to find a more potently active variant. Comment 0 Reblog It 0 The comments to this entry are closed. I've used it on anxious patients, but it has not been a resounding success compared to other drugs. Yes, my password is: Aug 20, - Yes they are Buspirone and Xanax are in the same class and have the same effect. Buspirone are considered to be the generic of Xanax to by most for physicians..
