I moved on, turning my attention to my patient, still sitting there looking annoyed. She deserved more professionalism, empathy and reassurance from me, as well as a clear, calm explanation as to why there were better ways to handle her daughter's illness than with cough syrup. Her daughter sat quietly on the exam table, coughing. What would you like to do? You can browse Drugs A-Z for a specific prescription or over-the-counter drug or look up drugs based on your specific condition. Next to her was Mom, probably in her mid- to late 40s, but by her clothes seemingly clinging to her youth -- tight jeans, bright pink sweater; it looked as if she shopped at Forever 21 in her local mall. I wasn't going to back down. Wasn't the kid old enough to tell me herself? She turned out to be an alcoholic who was drinking bottles of the stuff herself. Sometimes, the minute you step into the room, you just know it's not going to go well -- as it didn't with the mother of this teenage girl. This Site and third parties who place advertisements on this Site may collect and use information about your visits to this Site and other websites in order to provide advertisements about goods and services of interest to you. She told me her daughter actually had been sleeping, despite her cough. I'm usually much better at talking to parents, even demanding ones, and negotiating some kind of agreement. I should have explained to her, professionally and courteously, that prescription cough medicines have not been shown to be any more effective or safe than over-the-counter ones, and that there have been reports of young people taking promethazine-and-codeine cough syrup and dying from respiratory failure. In that sense, maybe we both deserved better from the encounter. Remember to always consult your physician or health care provider before starting, stopping, or altering a treatment or health care regimen. She had a snooty tone, the kind that says, "I know exactly what's wrong with her," while she told me her kid's story. The best way to treat it wasn't with cough medicine, but with a couple of inhaled medicines that reduce inflammation and open the airways. Nobody's sleeping at home, and now I'm getting it too. Neither Everyday Health nor its licensors endorse drugs, diagnose patients or recommend therapy. This combination medication is used to treat symptoms caused by the common cold, flu, allergies, or other breathing illnesses (e.g., sinusitis, bronchitis).
