This material is provided for educational purposes only and is not intended for medical advice, diagnosis or treatment. Antiadrenergic agents, centrally acting. By designating a single reference listed drug as the standard to which all generic versions must be shown to be bioequivalent, FDA hopes to avoid possible significant variations among generic drugs and their brand name counterpart. A Reference Listed Drug RLD is an approved drug product to which new generic versions are compared to show that they are bioequivalent. Every effort has been made to ensure that the information provided on this page is accurate, up-to-date and complete, but no guarantee is made to that effect. Osmolex ER Osmolex ER amantadine hydrochloride is a proprietary formulation of immediate release and Exclusivity is the sole marketing rights granted by the FDA to a manufacturer upon the approval of a drug and may run simultaneously with a patent. A Reference Listed Drug RLD is an approved drug product to which new generic versions are compared to show that they are bioequivalent. We comply with the HONcode standard for trustworthy health information - verify here. Ask your health care provider for advice if you are unsure about the online purchase of any medication. Kapvay , Duraclon , Nexiclon XR. Three-character codes are assigned only in situations when more than one reference listed drug of the same strength has been designated under the same heading. Two or more reference listed drugs are generally selected only when there are at least two potential reference drug products which are not bioequivalent to each other. If a study is submitted that demonstrates bioequivalence to a specific listed drug product, the generic product will be given the same three-character code as the reference listed drug it was compared against. The patent assigns exclusive legal right to the inventor or patent holder, and may include entities such as the drug brand name, trademark, product dosage form, ingredient formulation, or manufacturing process A patent usually expires 20 years from the date of filing, but can be variable based on many factors, including development of new formulations of the original chemical, and patent infringement litigation.
