The cost estimates were treated deterministically and only the price of losartan was varied in the sensitivity analyses. Head-to-head randomised, double-blind, active-controlled trials of adult patients were included. Funding No funding received. International Journal of Clinical Practice ; 65 3: Standard equations were used to estimate the long-term impact of changes in blood pressure. A validated approach was used for the meta-analysis that pooled evidence from multiple sources. The drug costs were based on their official prices except for generic losartan, which was based on expert opinion, while other costs were from a NICE guideline. The reference lists of retrieved articles were handsearched. The highest doses for both drugs mg per day for losartan and 32mg per day for candesartan were considered. The uncertainty was partly investigated, using a deterministic approach, which considered variations in the model inputs singly and focused on selected parameters. The selection of the clinical data was well carried out, with the relevant sources identified by a systematic search of the literature. Heterogeneity between the pooled studies was investigated. CRD summary This study compared the clinical efficacy and cost-effectiveness of branded candesartan and generic losartan in the treatment of hypertension and heart failure. Monetary benefit and utility valuations: The inclusion of head-to-head randomised trials ensured the validity of the clinical inputs. Type of economic evaluation Cost-utility analysis Study objective The objective was to compare the clinical efficacy and cost-effectiveness of two angiotensin II receptor blockers, namely branded candesartan and generic losartan, in the treatment of hypertension and heart failure. The objective was to compare the clinical efficacy and cost-effectiveness of two angiotensin II receptor blockers, namely branded candesartan and generic losartan, in the treatment of hypertension and heart failure. Oct 17, - The cost comparison charts are also available in Excel format to all stakeholders. (under password protection) on our NHS website: unahistoriafantastica.com The contents Candesartan (8 mg). Ramipril capsules (5 mg). Perindopril erbumine (4 mg). Ramipril tablets (5 mg). Irbesartan (mg). Enalapril (10 mg). About candesartan. Candesartan is a medicine widely used to treat high blood pressure and heart failure. Candesartan helps to prevent future strokes, heart attacks and kidney problems.
