The effect of Viagra may take up to an hour to become noticeable, so you should ensure you allow enough time before having sex. Viagra is not suitable for you if: Viagra, like many other tablets, can be taken with a glass of water. It can also cause a stuffy nose, dizziness, back or muscle aches, nausea or minor visual disturbances. Use our online assessment to order treatment. Eating fatty foods such as fast food may make this process very slow, so it is recommended to take Viagra on a nearly-empty stomach or several hours after a meal if you want it to take effect as soon as possible. However, licensed online doctor services such as Superdrug Online Doctor offer a safe way to order a prescription online. Originally trialled as a medication for a heart condition, it was found to work better for erectile dysfunction. Our in-house GP prescribes your medication Our doctors will review your order, issue your prescription and post it to you. It should not be taken with alcohol, as this can cause side effects, especially in men who suffer from conditions affecting the heart, liver or kidneys. Do not operate machinery or drive if you feel dizzy or experience any changes in hearing or vision after taking Viagra. If you are initially prescribed a 25mg dosage and this does not work as intended, you may require a 50mg dosage. Viagra works by relaxing the blood vessels and improving the blood flow to the penis, which makes it easier to achieve and maintain an erection. Viagra is the best-known of all the branded erectile dysfunction medications and is produced by Pfizer. It works by relaxing your blood vessels and increasing the blood flow to your penis. Your information is kept in the strictest of confidence. Order Your Prescription For Viagra Online.
