When Concerta was approved in , it was welcomed by doctors because it eliminated the need for patients to take Ritalin three times a day. Comment Vote up Report. In rare cases the inert ingredients are different and that might be what someone is having problems with. No problem at all, If he continues to not do quite as well on the Concerta I am putting down this copy of transfer the patient from immediate-release generic Ritalin to Concerta your son is on 18mg and if I'm looking at it right he really is closer to the 36mg daily But this is not uncommon it's always best to start the patient on the lower and add to it as needed. Also, I wanted to give you one more piece of Knowledge. Makers of Generic Drugs Challenge F. Previous efforts at developing long-acting forms of the drug had not been as successful. For patients already receiving methylphenidate: Sign In or Register. The lack of action by the F. Both of these are held to the highest standards and are allowed only 3. Just switched to brand Concerta. I have checked on the internet The agency allowed the companies to continue selling their drugs, but gave them six months to either prove the drugs were equivalent, or remove them from the market. DeAngelis, denied that the company was directing pharmacies to ask doctors to switch their prescriptions. Jun 17, - For my son, we just went back to Concerta 27 mg. The doc wrote the script for Concerta 27 mg and the pharmacy had to fill it with a certified generic. It took 5 days for Walgreens to get it in stock, but it's a gray cylinder pill with ALZA 27 written on it. Our previous insurance made us get brand name Concerta. I know one thing that was told to me by my psychiatrist to watch out for a couple of things, even with the brand name Concerta. She mentioned that should I start to experience bouts of anger (out bursts and sudden) without any provocation and the other thing is depression or extreme bouts of sadness. Several generic medications have been approved by Health Canada to be bioequivalent or interchangeable for brand name ADHD medication. There are approved generic forms of Strattera, Adderall XR and several versions of generic forms of Concerta. To-date, there have been no significant issues found with the.
