If any signs of an allergic reaction develop, contact an emergency medical service immediately: Retrieved 24 August
Patient Choice Program AstraZeneca Canada is pleased to offer our patients a choice to stay on our medications through
the innoviCares program. The following rare side effects are more serious. Retrieved 29 November The drug was billed
as a "super-statin" during its clinical development; the claim was that it offers high potency and improved cholesterol
reduction compared to rivals in the class. The AURORA trial randomized patients undergoing hemodialysis due to
kidney damage to receive either rosuvastatin or placebo. Retrieved 3 May As with all statins, there is a concern of
rhabdomyolysis , a severe undesired side effect. The randomized, double-blind study to found no difference in the two
groups in the primary end-point, a combination of cardiovascular mortality, nonfatal myocardial infarction, or nonfatal
stroke. S4 Prescription only UK: The following side effects should be reported to the prescribing doctor if they persist or
get worse: The results of the JUPITER trial suggested rosuvastatin may decrease the relative risk of heart attack and
stroke in patients without hyperlipidemia , but with elevated levels of highly sensitive C-reactive protein. Any reference
in these archives to AstraZeneca products or their uses may not reflect current medical knowledge and should not be
used as a source of information on the present product label, efficacy data or safety data. You are now leaving
AstraZeneca. The manufacturer responded by stating that few drugs had been tested so successfully on so many patients.
