Naproxen sometimes called Naproxen Sodium is a powerful anti-inflammatory painkiller. It is used to relieve muscular and joint pain, such as arthritis, as this normally also involves some sort of inflammation. Naproxen is taken twice daily with or after food whilst pain is present. Based in the UK, The Independent. Some brands of naproxen are specially coated to protect your stomach from irritation. Do not chew or break the tablets, as this will stop the coating from working properly. If you have been given enteric coated (EC) tablets, do not take any indigestion remedies during the two hours before taking naproxen, or during the two.
