Keck, MD, professor of psychiatry and pharmacology at the University of Cincinnati. Again, be sure your doctor is aware of any heart medications you are taking. During manic episodes, a person may feel very irritable, or may feel excessively happy and bursting with energy. These results suggest that not only is Geodon a healthier alternative, but patients may also be less inclined to stop taking it on their own due to weight gain. Ziprasidone comes with a long list of precautions and contraindications: Other drugs of this class -- notably Zyprexa and Risperdal -- are often used to help control the manic phases of bipolar disorder. Be careful not to stand up suddenly when taking Geodon, as one side effect can be dizziness caused by a drop in blood pressure. Gender Gap in Surgery Needs to End: To find the most current information, please enter your topic of interest into our search box. This content has not been reviewed within the past year and may not represent WebMD's most up-to-date information. There were no reported interaction problems between Geodon and Lithium or oral contraceptives. You should tell your doctor if you've noticed anything out of the ordinary in terms of the way your heart beats and whether or not you have had heart problems in the past. The primary endpoint in this study was time to recurrence of a mood episode requiring intervention. Feb 13, - Abstract. Aim.
