The FDA has determined that the generic versions are equivalent to brand-name Protonix; however, generic drugs may contain different fillers, dyes, or other inactive ingredients that can cause problems for people with allergies or sensitivities. Common Prescription Drugs with Generic Alternatives. Experts say that if your symptoms are in fact related to acid reflux you should do well on PPIs. Is There a Cure for Erectile Dysfunction? This combination can help gastroenterologists distinguish acid- and non-acid reflux episodes. Many times symptoms arise because people aren't taking their medication correctly or at a time that optimizes its effectiveness, Dr. Question Originally asked by Community Member Kim. Currently there are two different shipping methods available: Breakthrough symptoms may be a particular problem at night. Get the Facts on Upper Endoscopy. And missing a pill may readily ignite that familiar burning sensation in the chest and throat and sour taste in the mouth. Nearly one in four described those symptoms as severe or very severe, while close to half of the patients surveyed said their symptoms were moderate. If you choose this option, it cannot be undone, and you'll need to choose at least new topic to continue using your HealthSavvy programs. Hi Justme, I have not heard of Protonix specifically causing neck pain. However anything is possible. Listed side effects include, muscle cramps, muscle weakness or limp feeling. I agree that if you were experiencing rebound pain it should be long gone by now. You might want to talk to your PCP and discuss changing the. Apr 30, - 5 Reasons Why Your Heartburn Medicine Isn't Working (PPIs include brand names such as Nexium, Prevacid, Prilosec, and Protonix.) But they don't (For instance, if the impedance test registers a reflux but the pH level remains above a certain point, that indicates the reflux contains little or no acid.). Jan 6, - Currently, generic Protonix is available in two different strengths and in tablet form. The FDA has determined that the generic versions are equivalent to brand-name Protonix; however, generic drugs may contain different fillers, dyes, or other inactive ingredients that can cause problems for people with. "I just stopped taking Pantoloc (40mg daily) about 2 months ago and I think I have discovered that it was the reason I was getting migraines 4 times a week for the last 20 years. I have not been able to work because of these migraines ruining my life for so long. I am relieved to have found this out. Since I have stopped my. Feb 19, - I recently had a problem with a generic form of Protonix and the funny thing is that I had been taking a generic form that seemed to work fine. I had been getting the medication for some time from a local Walgreens pharmacy and felt it was time to get this medication from the mail order pharmacy under my. Feb 22, - "According to the FDA, generic drugs do not need to contain the same inactive ingredients as the brand name product. Inactive that patients start out on generic medications or switch to generic medications if they are available, since they almost always work as well and can save people a lot of money. USES: Pantoprazole is used to treat certain stomach and esophagus problems (such as acid reflux). It works by decreasing the amount of acid your stomach makes. This medication relieves symptoms such as heartburn, difficulty swallowing, and persistent cough. It helps heal acid damage to the stomach and esophagus. Mar 8, - I just realized after reading your post that my Protonix that I have gotten filled since January 24th have been generic. I started taking them at the very end of January, so that makes sense that they would be out of my system by February 12th. I really think this is what my problem is. I am going to the ENT on.
