[Find all posts by bab. Alcohol consumption was 0. I took it years ago as a teenager for OCD. I would fluctuate between mania and real rock bottom depression. I've been feeling so much better lately, able to go out more and less anxious. I took fluxotine prozac and for me they were the best thing ever! I'm having a bad today today but I think that is because I have my period. I did feel truly awful in the first week but I think it was because I read the side effects and then I looked out for them. Find all posts by Saddlebredgirl. I started taking fluoxetine 20 a week ago for my anxiety and panic attacks. My docter said i should go back to him in a month and then he will decide if i must stay on fluoxetine. I think they are gd i heard they get ris of somet out u brain witch doesnt make u so anxciou btw i took me about 2months till it started working. Page 1 of 2. Does fluoxetine influence blood sugar levels? Does fluoxetine really work for anxiety and panic attacks? Find all posts by guitarplayer So we will see if it helps this time. Panic attacks and work. Hi There I suppose the difficulty is that all meds react differently to different people so what works for one doesnt for someone else and vice versa - you have to do what your doc says and listen to your own body not others experiences - there are always other med if this isnt for you but i would give it at least 6 weeks x. Hope it works for you!Feb 16, - If you have panic disorder, you will likely be treated with an antidepressant medication. One popular antidepressant used to treat panic disorder and other conditions is Prozac \(fluoxetine\). Understanding Prozac. Prozac is the trademark name of the drug fluoxetine, a medication belonging to a class of. Twenty-five patients with a primary DSM-III-R diagnosis of panic disorder with or without agoraphobia were treated openly with the serotonin uptake inhibitor fluoxetine for up to 12 months. For most patients, treatment was initiated at 5 mg/day to minimize adverse effects previously reported with initiation at higher doses. Prozac \(fluoxetine\): "Took Paxil for the past 5 years for anxiety/depression/panic. Stopped it 1 year ago to pursue pregnancy. I did well for the 1st mos but then began to fall apart. Anxiety, panic attacks, depression all returned. I was put on Prozac because it's pregnancy friendly about 1 week ago. I've had the worst. Detailed Fluoxetine dosage information for adults and children. Includes dosages for Depression, Depression, Panic Disorder and more; plus renal, liver and dialysis adjustments. Apr 1, - The comparison of placebo and combined fluoxetine treatment also favored fluoxetine. Patients treated with either dosage of fluoxetine experienced a significant reduction in the total frequency of panic attacks compared with the placebo group. The three groups did not differ significantly in the number of. May 15, - Table 4 lists pharmacologic agents used to treat panic disorder and their common therapeutic dosage ranges. . studies of patients requiring acute treatment.811 Initial controlled studies of other SSRIs such as fluoxetine \(Prozac\), sertraline \(Zoloft\) and paroxetine \(Paxil\) are showing promise as well Imipramine \(one trade name is Tofranil\) and fluoxetine \(trade name Prozac\) are examples of old and new antidepressants that are useful in treating panic disorder. Though approved by the FDA for treating depression, most antidepressants will block panic attacks. Physical dependence does not occur on such medicine. Jan 3, - Efficacy of usual antidepressant dosing regimens of fluoxetine in panic disorder - Volume Issue 6 - D. Michelson, C. Allgulander, K. Dantendorfer, A. Knezevic, D. Maierhofer, V. Micev, V. R. Paunovic, I. Timotijevic, N. Sarkar, L. Skoglund, S. C. Pemberton. Mar 17, - question-mark Prozac, also known by the generic name fluoxetine, is an antidepressant in the SSRI class \(Selective Serotonin Reuptake Inhibitor\). Prozac being labelled as an antidepressant is a misnomer, as in addition to depression, Prozac treats anxiety disorders, such as panic disorder. Mirtazapine is an antidepressant whose side effect profile differs from that of first-line agents \(selective serotonin reuptake inhibitors\) used in the treatment of panic disorder. The present study compared the effect of mirtazapine and fluoxetine in the treatment of panic disorder in a double-blind, randomized, flexible-dose trial.](#)
