For more effective results take medicine regularly. Anafranil should be used with extreme caution in children younger than 10 years old; safety and effectiveness in these children have not been confirmed. Use Anafranil with caution in the elderly; they may be more sensitive to its effects, especially those with heart problems. The sudden stop may exacerbate some of the problems, so please consult your doctor. Anafranil may cause drowsiness, dizziness, or blurred vision. Your doctor can help you in case of the appearance or aggravation of any of Clomipramine side effects. Use a sunscreen or wear protective clothing if you must be outside for more than a short time. If it is the time you took the next dose, it is possible skip the missed dose and go on the treatment on your usual dosing schedule. Do NOT use Anafranil if: Anafranil is found in breast milk. Do not take 2 doses at once. To prevent constipation, follow a diet, drink more water. Be sure to keep all doctor and lab appointments. If you suddenly stop taking Anafranil, you may have withdrawal symptoms. Lab tests, including complete blood cell counts, may be performed while you use Anafranil. Missed dose When you get Clomipramine, try not to miss doses. Tell your health care provider if you are taking any other medicines, especially any of the following:. To reduce the risk of side effects including stomach disorders, the doctor may prescribe a small dose, and split it into several doses per day with meals. But double dose is forbidden. You will need to discuss the benefits and risks of using Anafranil while you are pregnant.
