January 31, Strength s: The question of whether prices will stay high has become a flash point in a dispute between Sun Pharmaceuticals, which owns two-thirds of Taro, and minority shareholders who have argued that the shares are worth more than Sun is offering. View all New York Times newsletters. Newsletter Sign Up Continue reading the main story Please verify you're not a robot by clicking the box. In certain instances, a number is added to the end of the AB code to make a three character code i. The added revenue from the higher prices has improved the bottom lines of the handful of companies that make such drugs, and has even figured into a contested buyout of one of the companies by an India-based drug maker, Sun Pharmaceuticals. In July, a special committee of the board rejected a buyout bid by Sun, describing the offer as inadequate. If a study is submitted that demonstrates bioequivalence to a specific listed drug product, the generic product will be given the same three-character code as the reference listed drug it was compared against. Two or more reference listed drugs are generally selected only when there are at least two potential reference drug products which are not bioequivalent to each other. Ask your health care provider for advice if you are unsure about the online purchase of any medication.
