Email questions to Doc at [saturdaylife\\_gleanerjm](mailto:saturdaylife_gleanerjm). They can certainly cause physical side effects like dizziness, headache, chest tightness, vision problems including loss of vision, irregular heartbeat, and more severe issues. It will tell whether you really have a lump or not. But whether you tell your mother and father or not, I beg you to consult a doctor during this coming week. Fortunately have not experienced many of the side effects. Please, I'm afraid I might start contemplating suicide, and I do not want it to get to that. But a couple of nights ago, I had another breakdown, so I used my fingernails and repeatedly scratched myself violently. I have minor nasal stuffiness, and a 'flushing' effect that lasts about ten minutes. Have I got some sickness, Doctor? Mostly, those guys have problems because of narrowing of the arteries - the tubes that carry blood to the male organ. And nerves are the enemies of erection. Why does all of this happen to you, and to many other young people? Emilio Costantino March 24, Last week, I was in Clarendon and I met a girl of 18 there. In some ways, it is a good thing that you were unable to have sex with that girl. But a year or two back, during one of these fits of crying, I saw a sharp object. Jan 5, - Q I am 18 years of age, and ever since I was 13 years old, I can't remember a time when I was completely happy for a day. Don't get me wrong, Doc. I don't have a terrible life, but I do have problems. There are times when I am around friends or family and I am having a blast. But suddenly my mood changes. Aug 4, - I am 15 years old and I have heard that using Viagra can make erections harder and better. My girlfriend and I were wondering if it was safe for me to use Viagra at my age. I have no history of heart or blood pressure problems and I do not use medications of any kind. I am not getting as hard as I want to get. Anxiety is quite common for a guy's first time or two. Instead of trying Viagra which won't give you an instant erection (you have to be stimulated) and if like the US, you'd need a doctor's prescription, anyway. Unless, of course, you have anot. You are 17 years old and at that age I am pretty sure the erections you are having are pretty easy to get and thus useful for doing the deed. Taking erectile dysfunction drugs when you actually don't have a problem will complicate matters for you. You will surely have certain symptoms such as blurry vision, headaches and. Jul 27, - It will work on males, but there are adverse effects when a young male uses it. In a very few years, he will be afflicted with erectile dysfunction and Viagra won't help. It seems that you are all for his experimenting with Viagra so let me ask you this question. An ejaculation lasts about ten seconds. Is a few. Dec 29, - Don't worry about lasting only 30 min. Dude. At age 15, u can do a repeat in about 5 min. rest. Around age 20 and 21 you will be able to just go on and not stop between cumming off, until you shoot blanks after a whole bunch or [unahistoriafantastica.com](http://unahistoriafantastica.com) after another. From what I have read, Viagra and the others like it. Jan 5, - It seems to me that if I take Viagra a few times after a short spell of depression, I can rebuild my confidence and regain my ability to achieve and maintain Because I have to buy Viagra off the internet, it is so expensive, and the fact that it costs over \$15 a dose means that I cannot afford it even if I sacrifice.
