Singulair side effects relating to adhd in adolescent? If you help your body do what it is designed to do it will do incredible things Posted over a year ago - Reply. When i read this forum it occurred to me that the behavioral changes have all started since I started this drug. Since then I have had to put a diaper on him at night, I will go to an allergy specialist naturopath I am so glad I came across all this info before I went to the pharmacy to get Singlair. Results and actual experiences are enough to deter me from using a drug. Talk to your doctor right away. Thanks again and I really hope you all have success with combatting your kids allergies without horrid drugs such as these! Thank you all for the stories! The allergies i manage as they come but my sweet boy is back with the occassional naughtiness but nothing like before. Yesterday was my breaking point, when my 5 year old decided to beat up a 4th grader because he laughed at him. I am taking him off it and I will update on the results. This Site and third parties who place advertisements on this Site may collect and use information about your visits to this Site and other websites in order to provide advertisements about goods and services of interest to you. I don't want to treat with drugs. His allergies have been well controlled but at too high a cost. Oh well, if the cat has to go, it beats my kids having these issues with the Singulair!Mood disorders, including major depressive disorder, dysthymic disorder and bipolar disorder, are common in the United States (US). ..
