However there are some interesting differences. Different erectile dysfunction medicines suit different people, but it is difficult to tell which one will be best for you until you have tried them all. All three have similar side effects headaches, stuffy nose, facial flushing, stomach ache or back pain being the most common. Modern pharmaceutical market offers many alternatives which are different in price but equal in a provided effect. If you choose Cialis or Viagra we will recommend to take Cialis as it performs a more lasting effect. Recent Posts How do men around the world treat ED? The main difference to Viagra is that Levitra tends to be less affected by food or alcohol so can be taken with meals. This means that a lot is known about its effects and side effects. Cialis should not be taken by men who are on medicines called alpha blockers which are sometimes used to treat prostate problems or high blood pressure. There is also some evidence that Levitra is more effective in diabetics than other erectile dysfunction medicines. You can buy 25, 50, mg Viagra pills according a type of erectile dysfunction and the symptoms you have. Over a half of patients of years old have completely recovered after a month of treatment with Cialis 5 mg in the evening. The key con of the medicine is its price. Cialis is a perfect choice for patients who have permanent erectile dysfunction in its severest form. Staxyn is another generic of the original drug and it is cheaper. This drug acts in the same way as Viagra does. Many patients consider another choice being Staxyn vs Viagra. Viagra, Cialis and their generic forms just stimulates and supports the erection while your body is able to completely recover on its own.
