Clinical trials compared Treximet, which is a combination of 85 mg Sumatriptan and mg Naproxen Sodium, to the individual components alone and to placebo. Just say no to new drugs. But just beware that the drugs are marketed before the testing is finished. Just think of how many "new wonder durgs" have been taken off the market after killing or maiming thousands. When taking any medication prescribed by your doctor or health care professional, you should know exactly what kind of drugs are being prescribed to you and their effects and so-called "side effects". Information for General Purposes Only: You should know the name of the active ingredients as well as the generic name of the drug. The only way to safeguard your safety is to educate yourself, ask questions, and discover natural alternatives with no side effects. This is not to say that there aren't some good new drugs. We respect your privacy and hate spam as much as you do. You can read about green-lipped mussel oil here. Thomas Beecham Silas M. Email Marketing by GetResponse. How Does It Work? They may be putting their life at risk of serious side effects, including death. Little-Known Secret Source of Omega In the end, you will bear the consequences of your decisions, not your doctor or the pharmaceutical company. The Generic name is listed first and then the brand names.
